The iPowerPlus 3KVA/24V runs on a pure sine wave technology. It is well shielded from short-circuits and overload complications with automated tripping off when the batteries get to the threshold. It is a hybrid system with an in-built solar charge controller that has a complementary in-built cooling system comprising of heat zinc and fans.

A solar generator is a portable generator that usually works along with solar panels. It typically acts as an automatic backup battery to power your home and your household appliances and/or electronic devices when you run out of electricity due to power outages.

It works great with off-grid solar systems, so it's perfect for people living off the grid or in remote locations. Truck drivers can use it in their semitrucks too, and it's even powerful enough to be a portable solar generator. Plus, the 3KVA 24V MPPT inverter can convert power to 115V, which is the standard voltage in the USA.
