How useful is a 500 watt power supply?

The usefulness of something of this grade is pretty endless. My partner got it confused with looked to be a similar product at Costco but if you know your stuff, the specs are exponentially different - the 500 watts is continuous power (with a 1000 peak) so it can pretty much power any steady device.

How many watts can explorer 500 charge?

A: The Explorer 500 can charge/power devices that operate at less than 500 watts and the total wattage of all connected devices should also be under 500 watts as well. If the power requirement exceeds this limit, the Explorer 500 will automatically shut off. Please check your device's specifications before making a purchase.
