THE CHARGE CONTROLLER is at the heart of every solar power system, and is required to monitor and control the power going into and coming out of the battery. It must also manage the power generated by the solar panel to ensure it does not overcharge the battery. The charge controller must also ensure that the connected loads don't over-discharge

Download technical specification here: 8w fold up solar panel: Contents 1 x 8w fold up solar panel with a cable storage pocket 1 x 3m cable fitted to the 8w panel 2 x 200mm extension cables. One with crocodile clips and the other with 12V auto plug 4 x rubber suction cups 1 x instruction sheet Two-year product warranty .

Standard solar panel specification sheet: Page 1. Most standard solar panel specification sheets are a two page affair. The key parameters are as follows: Output (Watts), as measured at standard test conditions (STC) ...

The 8W fold up solar panel comes with a two year warranty. Download the technical specification for the 8w fold up solar panel. The self contained pack has a handy pocket for cable storage

Understanding Solar Panel Basics Solar Panel Components. To understand solar panel specifications, it's crucial to grasp the components that make up a solar panel:. Solar Cells: Solar cells are the heart of a solar panel. They are made of semiconductor materials, usually silicon, that convert sunlight into electricity through the photovoltaic effect.

The 8W fold up solar panel is the most efficient way to keep a car, truck, boat, campervan, motorbike or caravan battery charged. Folding into a tiny 230 x 198 x 15mm package makes it easy to store. ... Download the technical specification for the 8w fold up solar panel. The self contained pack has a handy pocket for cable storage.
