

Adelsystem cbi245a Saint Martin

Available models: CBI245A. The real-time recognition system allows constant monitoring of battery errors such as short-circuit elements, reverse polarity connections, battery disconnection. All of this is automatically detected and removed with the help of the Diagnostic Led, significantly reducing the risk of damage to the unit. Our vote:

Technical features Thanks to the All In One units (DC-UPS), it will be possible to optimize power management. The available power is automatically allocated between load and battery, supplying power to the load is the first priority of the unit thus it is not necessary to double the power, because also the power going to the battery will go to the load if the load so requires.

Adelsystem is highly specialized in remote monitoring solutions. DC-UPS line has the MODBUS RTU RS485 protocol communication, over 100 parameters about the DC-UPS and batteries condition. Monitor, receive alarms, configure, and log data 24/7.

The declared ambient temperature operations field starts from -25 up to 70°C. Three short-circuit overload protections (Hiccup Mode, Fold Back e Restart after Main), the small sizes of the units, and the appliance to the EN 60204-1 Safety of Electrical Equipment Machines change the way to supply power to the control panel.

ATTENZIONE! ADELSystem sta attraversando situazioni in cui organizzazioni non legali sfruttano il marchio ed indirizzo ADELSystem per la vendita di prodotti non pertinenti alla nostra azienda. Ci spiace che ci sia avvenuto, ma abbiamo già denunciato alle Autorità tali disfunzioni. Pertanto ADELSystem non ha nulla a che fare con i seguenti siti:

ADEL System propone una gamma completa di alimentatori industriali, realizzati per le più svariate applicazioni. Il loro ampio campo di funzionamento, con riferimento alla tensione in ingresso, permette loro di operare in qualsiasi parte del mondo.
