

Alterra energy Tokelau

Technip Energies and Alterra Energy ("Alterra") today announced they have signed a global joint development and collaboration agreement to integrate Alterra's commercially available liquefaction process technology with Technip Energies' pyrolysis oil purification technology to maximize adoption of recycled feedstock and improve circular ...

Solar Array's seen on the three tiny islands of Tokelau to completely produce solar power energy. The renewable energy system comprising of solar panels, storage batteries and generators running on biofuel derived from coconut will generate enough electricity to meet 150% of the islands' power demand.

Alterra has developed a liquefaction technology that, unlike many of its competitors, is a continuous, rather than a batch or semi-batch process. The technology produces pyrolysis oil: "At scale, our facility in Ohio is ...

The present collaboration follows logically from the earlier partnerships between the companies. Alterra and Neste started collaborating in chemical recycling in 2021, jointly improving aspects of Alterra's technology and creating respective value chains. Alterra and Technip Energies started their collaboration in chemical recycling in 2022.

I am the Chief Development Officer for Alterra, where I lead the company's global development efforts, overseeing strategic partnerships and large-scale project implementations. I have extensive international experience and spent most of my career in the energy sector, working on projects for major petrochemical companies, focusing on ...

Alterra has developed a liquefaction technology that, unlike many of its competitors, is a continuous, rather than a batch or semi-batch process. The technology produces pyrolysis oil: "At scale, our facility in Ohio is commercial," said Fred.

Alterra Energy works in advanced recycling technology within the waste management and petrochemical industries. The company converts discarded plastics into their original building blocks, which can be used to produce new plastics and other products.

Join The Solution Be Part of Our Team. We have some of the brightest minds in engineering, operations, and strategy on our team. We are accelerating our partners' sustainability capabilities using cutting edge technology that assists in achieving the global imperative of plastic reuse in order to clean the planet. That

Join the Movement Doing Your Part to Help Solve Plastic Pollution. While our plastic circularity technology converts hard-to-recycle plastics into Infinitely Renewed Plastics(TM), there's plenty more we can all do in our everyday lives to promote more sustainable practices and decrease our carbon footprints.

What does Alterra produce? Alterra has developed a liquefaction technology that, unlike many of its competitors, is a continuous, rather than a batch or semi-batch process. The technology produces pyrolysis oil: "At scale, our facility in Ohio is commercial," said Fred.

This strategic partnership combines Ravago's expertise in the mechanical preparation of plastic waste, Alterra's proprietary liquefaction technology, and Neste's expertise in the processing of hydrocarbons. Neste and Ravago are aiming for a first industrial chemical recycling site in North Sea Port in Vlissingen with an annual processing ...

Alterra Energy in brief. Alterra Energy, based in Akron, Ohio, is a leader in developing and commercializing continuous recycling technology, which transforms waste plastic into petrochemical products that can be further refined into fuels, waxes and new plastic production. Its proprietary process supports global climate efforts in two ways: by ...

The company benefits from its robust project delivery model ...

What are responsible national and global standards for recycling and creating a circular economy for hard-to-recycle plastics or single-use plastics? At Alterra, we have a simple answer to that complex question: more. And that more depends on many factors, from municipalities to businesses to consumers and their collective desire to do more.

Chairman, Alterra. Dr. Sultan Ahmed Al Jaber is a member of the UAE Federal Cabinet, Minister of Industry and Advanced Technology, and the COP28 UAE President. ... Designed to drive large-scale climate investments, powering innovation and impact across vital areas like renewable energy, sustainable infrastructure, and innovative technologies. ...
