What can communities from coast to coast do to boost energy resilience?

Communities from coast to coast can partner with experts from regional organizations, national laboratories, and the U.S. Department of Energy to boost energy resilience and plan for renewable energy futures.

What is Block Island's energy plan?

Block Island, Rhode Island is looking to identify renewable energy sources that can be used to generate electricity on the island and reduce reliance on imported electricity and fuels. The community will engage in energy planning to shore up its resilience, particularly in the face of sea-level rise.

What are the challenges faced by remote and island communities?

Remote and island communities face several energy challenges, including unreliable power, lack of robust connections to mainstream power grids, and threats from strengthening storms.

Can solar power help Puerto Rico achieve energy independence and resilience?

The Puerto Rican islands of Vieques and Culebra will study the feasibility of achieving energy independence and resilience using rooftop and community solar power. DOE partners with these islands to provide renewable energy.

The Caribbean islands considered part of the United States Minor Outlying Islands include Navassa Island, a small island off the coast of Haiti that is claimed by both Haiti and a small group of Columbians calling ...

Hydrogen has the potential to transform the global energy landscape, but its success hinges on a customer-first approach. Companies and governments must take a cue from Steve Jobs' wisdom and start with the customer experience, working backward to ensure that hydrogen technology is accessible, reliable, and aligned with real-world needs.
