How will Kyrgyzstan's Toktogul power plant project affect water consumption?

The power plant project is expected to gradually shift Kyrgyzstan's Toktogul hydroelectric power plant's operating mode from a power-generating mode to an irrigation mode in the summers, leading to the growth in water consumption in neighbouring Kazakhstan's southern regions during the planting season.

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided
