With a new energy cable to connect the Åland Islands with mainland Finland, the archipelago receives a long-term solution for ensuring supply of energy and an opportunity to sell its wind-generated power on the regional market. Currently the Åland Islands rely on up to 70% of its electricity being transferred via cable from Sweden.

The ambition is to develop large scale hydrogen production on Åland integrated with gigawatt scale offshore wind in Åland waters for use both on Åland and in the wider European region, thereby supporting Åland's and EU ...

On April 29, the energy project on Åland was presented during a webinar hosted by FEDARENE and presented by Tommy Lindström, Berndt Schalin and Christian Pleijel. Tommy Lindström opened the floor by giving a brief history of islands cooperation such as the European IsleNet, which gave life to many island initiatives. ...
