Will Batam be Indonesia's first commercial photovoltaic plant?

Should the timeline proceed on schedule, Batam will be the first location in Indonesia to have a major commercial photovoltaic (PV) plant operating on a large scale. Indonesia currently has only a handful of PV plants, each with less than 50 megawatts of capacity.

Why should Indonesia invest in Batam PV project?

"The Batam PV project will not only offer competitive pricing, but will also make Singapore's power tariffs stable and predictable. For Indonesia, it means increased investment." Indonesia now relies mainly on affordable fossil fuel to generate electricity.

Why is PT PLN Batam partnering with Sembcorp?

This project will mark yet another step in Sembcorp's transition from brown to green, while contributing to the region's energy transition. "Nyoman S. Astawa, President Director, PT PLN Batam, said: "As PT PLN Batam begins our own transition journey, this joint development will enable us to build our
