As Barbados pursues its ambitious 2030-2035 carbon neutrality target, the question of energy storage looms large. How can we bank the power generated from renewable sources like solar and wind when the sun isn't shining and the breezes falter?

The pilot project will focus on the use of battery energy storage systems of four-, three- and two-hour durations, with a total allocated capacity of 50 megawatts (MW)." As such, the regulator has determined for a two-hour battery up to 25 kilowatt (kW), the energy storage rate will be set at \$0.675 per kWh and \$56.78 per month.

Barbados has initiated its first procurement for battery energy storage systems in a bid to support the growing interest in renewable energy investment on the island. Last week, the island government announced that the call for request for information (RFI) for new battery storage capacity and the publication of the competitive procurement term ...
