

Which institutions are working to provide access to affordable energy in Benin?

Several institutional frameworks in the energy sector in Benin are working to provide access to affordable energy in the country. The ME is the biggest institution of the energy sector, responsible for the management of the energy sector and in charge of the implementation of RE projects.

What is Benin's current energy situation?

This section provides information on Benin's current energy situation with energy demand-and-supply scenarios. According to the International Renewable Energy Agency (IRENA), 41% of Benin's population currently have access to electricity.

What is the energy sector strategy in Benin?

In Benin, the energy sector strategy is aimed at improving the energy independence of the country and diversifying its sources of supply through the implementation of various interconnection projects with neighbouring countries and the enhancement of the national RE potential.

What type of energy is used in Benin?

The evolution of the electrical mix of Benin indicates that, in 2020, natural gas was the first form of energy used to produce electrical energy, representing a proportion of 71.63%. Solar photovoltaic (PV) accounts for 0.30% of the mix by form of energy compared with 1.36% in 2016, as shown in Fig. 3.

Is Benin energy dependent?

In 2015, Benin was energy and electrically dependent at 41.3% and 76%, respectively, which worsened given energy imports at 1319.45 GWh in 2018 relative to 1202.15 GWh in 2017, an 8.07% increase due to a 76.80% drop in national electricity production in this period.

Is Benin a good country for energy?

With a total surface area of 114 763 km², the country is endowed with a high potential for energy resources. However, almost 59% of Benin's population currently lacks access to electricity and the country is heavily dependent on external energy importation.

Benin's share of electricity production from petroleum products (154.2 GWh), was 4.1%, 7.1%, and 10.3% that of Senegal's, Mali's, and Burkina Faso's total petroleum electricity ...

Benin's energy sector has set the vision of being self-sufficient in energy, allowing everyone in the country to have access to modern energy in quantity, quality and at a lower cost, to ensure universal access to clean energy by 2050.

Benin has amongst the lowest greenhouse gas (GHG) emissions globally, yet it remains one of the most vulnerable countries to climate change, ranking 152 out of 181 countries for extreme climate vulnerability. Floods are increasingly severe and pose significant challenges to the inadequate water supply, sanitation, and waste collection systems.

This study aims to forecast the energy demand for Benin while reducing greenhouse gas (GHG) emissions and propose alternative solutions to clean energy deployment barriers. The Low Emissions Analysis Platform (LEAP) is used to explore the future energy demand for Benin and associated GHG emissions.

Das Kraftwerk „Maria Gleta“ in der Nähe der Stadt Cotonou, Benin, wurde von Dona Jean-Claude Houssou, dem Energieminister von Benin, sowie von Vertretern von MAN Energy Solutions und BWSC feierlich eingeweiht. Die Anlage ist nun vollständig in Betrieb und wird das Stromnetz von Benin mit 127 MW elektrischer Leistung versorgen.

In this article, we summarize various sources and potential of renewable energy available in Benin. We then analyze the problems undermining the policy of developing renewable energy ...

At Spiro, we are dedicated to enhancing livelihoods through sustainable energy by leading the large-scale electrification of mobility across Africa. We provide innovative, eco-friendly, affordable electric transportation solutions that transform urban mobility, reduce carbon emissions, and promote a cleaner environment.
