

What is Bess & how does it work?

BESS enables the storage of excess variable energy generation, enhancing the grid's capacity and reliability. BESS are able to store excess energy produced in periods of low demand, which can be discharged into the grid during periods of high demand. BESS operators can therefore receive financial returns for meeting surging energy needs.

Where is ADB implementing Bess projects?

ADB is implementing BESS projects across Asia and the Pacific, from small-scale projects in the Maldives, Philippines, and Pacific Islands, to large-scale projects in Cambodia, Thailand, and Mongolia.

How has Bess performed in the next 1-2 years?

Day-ahead price spreads capturable by 2 hour duration BESS recovered from below 40 €/MWh in Feb to around 70 €/MWh in Aug. BESS revenues have also been supported by: an increase in negative prices & intraday value capture. Gas price levels and the pace of RES penetration growth are two key drivers to watch across the next 1-2 years.

How is Bess revenue recovery evolving in 2024?

A recovery in BESS revenues has been underway since Feb 2024, as gas prices have recovered & weather conditions normalised. Rising price volatility (& negative prices) from increasing RES penetration have also been an important factor supporting revenue recovery. Let's look at how the 2024 revenue recovery is evolving across each of the 3 markets.

Why is Bess revenue capture lower in the north & south?

BESS revenue capture in the North is typically lower than in the South (& on the islands). This is a result of high flexibility available in the North (e.g. flexible hydro, pump storage & CCGTs) which dampen day-ahead price spreads. Liquidity on the intraday market is still very low compared to Germany & GB.

How did German Bess perform in Q1 2024?

Q1 2024 was challenging for German BESS, with achieved revenues plunging below 100 EUR/kWh as a mild winter & weak gas prices took hold, as shown in Chart 1. However German BESS assets have seen a sharp revenue stack recovery across Q2-Q3, with revenues back above 150 EUR/kWh levels in Q3.

17 %; "As one of LG Energy Solution Vertech's customers for its domestic supply of BESS, we have secured access to a reliable and diversified supply chain, steady pricing and ...

The auction is designed to promote investment in large-scale power generation projects for decarbonisation with a procurement target of 1 GW per annum across BESS and pumped hydro assets. BESS must have a minimum capacity of 10 MW and a 3-hour duration to qualify. ... How Japan is Driving BESS Investment
