Why did CATL invest \$1.4 billion in Bolivia?

Chinese battery giant CATL confirmed a \$1.4 billion investment to help develop Bolivia's huge but largely untapped reserves of lithium, cementing on Sunday a partnership with the government made in January.

Could Bolivian lithium be the future of battery production?

Bolivian lithium could serve as the initial phase of a production chain, with factories in Argentina and Chile producing batteries, while Andean and Central American countries contribute to the lithium platforms, ultimately delivering a high-quality product to the U.S. market.

Will CBC invest \$1 billion in a lithium plant in Bolivia?

Bolivian President Luis Arce said CBC would invest over \$1 billion in the project's first stage, boosting infrastructure, roads and conditions needed to start up plants the country hopes will one day produce lithium cathodes and batteries. He added that talks were ongoing for potential partnerships with other foreign firms.

Who is developing Bolivia's lithium reserves?

LA PAZ -Bolivia has chosen a consortium including Chinese battery giant CATL to help develop the South American country's huge, but largely untapped, reserves of lithium after a lengthy bidding process involving firms from the United States and Russia.

What is the price of lithium in Bolivia?

The price of battery-grade lithium reached close to \$85,000 a tonne toward the end of 2022. Energy minister Franklin Molina said the move showed there were "sovereign alternatives to the privatization models of lithium exploitation." Bolivia state firm YLB is set to supervise and take a central role in the project.

Is a window of opportunity closing for Bolivia's lithium industry?

Although the Bolivian government has invested significant time, effort and resources in developing its lithium industry with mainly Chinese and Russian capital, it seems that the window of opportunity to capitalize on the surging demand for lithium is closing, with China, the European Union and the United States rapidly dominating the market.

Lithium could power Bolivia's economic future. The Bolivian government has long wanted to become a player in lithium ion batteries, which are used in electric cars, cell phones, laptops, and ...

Bolivia chose Chinese battery giant CATL to aid in developing its substantial but largely untapped lithium reserves, as per the Tweet of Benchmark Mineral Intelligence CEO Simon Moores on January 21. Contents

In light of the French government describing the need to secure lithium resources as "a battery race" among national economies, it might seem obvious that Bolivia, which possesses the world's largest known lithium
