What will the 100MW solar power plant do for Botswana?

The 100MW Solar Power Plant will augment Botswana's power supply portfolio and reduce the country's carbon footprint and help conserve the environment. Botswana has one of the highest solar energy ratings globally.

Why does Botswana need solar power?

Botswana is seeking a reliable and cost-effective electricity source, as hydropower is no longer viable due to droughts [Why does Botswana need solar power?]. To encourage the adoption of PV systems, Botswana imposes 20% import duties on solar lights and lanterns (and 5% on solar batteries), and offers net-metering for rooftop installations.

Can China build a 100-megawatt solar plant in Botswana?

Photographer: Guillem Sartorio/Bloomberg (Guillem Sartorio/Bloomberg) (Bloomberg) -- A group of Chinese companies led by China Harbour Engineering Co. has won a contract to build a 100-megawatt solar plant in Botswana, the country's second utility-scale renewables facility.

How will Botswana provide secure power supply for the country?

On Mission to provide Secure Power Supply for the country, Botswana Power Corporation has initiated the process to appoint a Joint Venture Partner for the construction of a 100MW Solar Power Plant to supplement the supply into the national grid that is currently generated by the Morupule B 600 MW Power Station.

The group initially focused on power and power generation products, specializing in imports and exports in the Middle East, Africa, South East Asia and Europe region. In 2017, Power N Sun Solar Equipment's Trading LLC was established as a 100% subsidiary of Orange Overseas FZE, registered in Dubai as a limited liability company.

The Midweek Sun.
