Where is Bouvet Island?

Bouvet Island (/ˈbuːveɪ /BOO-vay; Norwegian: Bouvetøya [bu'vè:oeY?]) is an uninhabited subantarctic volcanic island and dependency of Norway. It is a protected nature reserve, and situated in the South Atlantic Ocean at the southern end of the Mid-Atlantic Ridge, it is the world's most remote island.

How did Bouvet Island become a dependency?

The expedition carried out aerial photography of the island and was the first Antarctic expedition to use aircraft. : 64 The Dependency Act, passed by the Parliament of Norway on 27 February 1930, established Bouvet Island as a Norwegian dependency, along with Peter I Island and Queen Maud Land.

How did Bouvet Island get its name?

At that point, the island was given its current name of Bouvet Island ("Bouvetøya" in Norwegian). In 1930, following resolution of a dispute with the United Kingdom over claiming rights, it was declared a Norwegian dependency. In 1971, it was designated a nature reserve.

How far is Bouvet Island from Antarctica?

Bouvet Island is one of the most remote islands in the world. The closest land is Queen Maud Land of Antarctica, which is 1,700 km (1,100 mi) to the south, : 58 and Gough Island, 1,845 km (1,146 mi) to the north.

Could Bouvet tell us about the past climate of Antarctica?

One minute the skies are clear, the next you're surrounded by cloud. No wonder sailors call Bouvet the world's most remote island; no wonder writers and science fiction movie-makers keep using it in their storylines. But this loner is drawing increasing scientific interest for what it could tell us about the past climate of Antarctica.

How does wind affect Bouvet?

Diatoms (tiny algae) that live at the surface of the ocean are whipped up in sea spray. The windier it is, the more concentrated their presence will be in the layers of snow settling on Bouvet. And it's not just a record of winds that Dr Thomas's team can extract.

We've got a place that beats them all: Bouvet Island, a small outcropping of rock and ice in the Southern Ocean. The nearest land is more than a thousand miles away, making Bouvet the most remote island on the planet. A French sailor named Bouvet discovered the island in 1739. And then he promptly lost it -- he misplotted the island on his ...
