Earthquake energy and rupture duration are estimated by integrating P-wave energy from a global distribution of stations from 25-80 degrees distance following all Mw 6.0+ earthquakes with a GCMT moment tensor. The method follows Convers & Newman, 2011.

The island lies 1,700 km (1,100 mi) north of the Princess Astrid Coast of Queen Maud Land, Antarctica, 1,870 km (1,160 mi) east of the South Sandwich Islands, 1,845 km (1,146 mi) south of Gough Island, and 2,520 km (1,570 mi) south-southwest of the coast of South Africa. It has an area of 49 km 2 (19 sq mi), 93 percent of which is covered by a glacier.The centre of the island ...

By clicking submit, you are giving permission for NWEI to respond via the email address above and directly provide additional details about energy educational opportunities. You will also be added to our infrequent newsletter (sent 4-6 times a year) so we can inform you of any important news (dates, availability, cancellations..ect).
