Are Cambodia's solar panel exports facing a critical juncture in 2024?

After a short-lived boom in 2022-2023, Cambodia's solar panel exports entered a critical juncture in 2024, facing significant challenges.

Why are solar panels becoming a trend in Cambodia?

Vansopheaktra Odorn Tep and Chunyu Yang For decades, Cambodia's high economic growth has been fueled by strong garment exports, supported by tourism. However, a new trend in the country's exports has emerged in the past two years - a sharp increase in electrical and electronics (E&E) manufacturing products, particularly solar panels.

What is EcoSun (Cambodia)?

EcoSun (Cambodia) Co., Ltd. has been dedicated to supporting Cambodian households since 2008 by reducing their daily energy consumption and distributing a large range of solar products. From small appliances to large solar and hybrid systems, EcoSun brings solutions where grid power is inaccessible, unavailable, or unstable.

Are solar panels imported or re-exported in Cambodia?

During the same period, the country's solar panel imports rose rapidly and doubled to USD272 million but the volume was significantly lower than solar panel exports (Figure 1). This trade pattern suggests that a substantial portion of Cambodia's solar panel exports may have been assembled domestically rather than imported and re-exported.

Where are solar panels made in China?

An employee works on the production line of solar panels at a photovoltaic enterprise on August 28, 2023 in Lianyungang, Jiangsu Province of China.
