A 30-year study of the estuarine population of yellow eel, *Anguilla anguilla*, abundance in Bridgwater Bay, Somerset, UK, shows that the population number has collapsed. Since 1980, the decline has averaged 15% per year. The abundance of eel in 2009 is estimated at only 1% of that in 1980.

The suggestion that there may be a limit to the number of niches available to helminth species in the intestine of *Anguilla anguilla* was investigated by examining the frequency distributions of the number of helminth species per eel and the relationships between maximum and mean infracommunity richness and component community richness in 1 locality over 17 years and in ...

4 ???· The City of Cambridge announced a virtual power purchase agreement (VPPA) for 50MWac of the 135MWac Prairie Solar project, located in Champaign County, Illinois. MN8 Energy, a leading renewable energy company, owns and will construct and operate the project, which BayWa r.e. Americas (BayWa r.e.) developed. This procurement is the largest VPPA ...

Dramatic declines in American eel (*Anguilla rostrata*) recruitment have resulted in strong conservation measures being implemented. Recovery actions in Ontario have included stocking of glass eels. Given the financial costs and imperative to undertake effective recovery actions, post-stocking monitoring is essential.

Cambridge Power has secured planning permission for a 60MW Battery Energy Storage System (BESS) in Redcote Lane, Leeds. The storage developer was also able to secure an Autumn 2024 connection date from Northern Power Grid, a much swifter connection time than its 13-year delayed 50MW Newcastle Upon Tyne BESS site.

Cambridge Power, part of the Pigeon Group, specialises in the planning and development of grid-scale energy storage and renewable generation assets across the UK. The company is actively working to support the UK's

Cambridge power Anguilla

transition to a Net Zero carbon economy by 2050 through its pipeline of energy projects.

Cambridge Power, founded in 2018 by Pigeon, develops grid-scale battery energy storage systems (BESS) and renewable generation assets throughout the UK. These projects are scheduled to be developed and constructed within the next decade, contributing to the substantial growth of renewable energy infrastructure in the UK.

Cambridge Power has secured planning permission for the construction of a 100MW battery energy storage system project (BESS). The project will be located in Bramford, Suffolk and adds to the company's growing ...

During a press briefing on Tuesday, September 13, 2022, Mr Sutcliffe Hodge, CEO of the Anguilla Electricity Company, Ltd. (ANGLEC), shared plans with the media for the company's roll out of a phased approach to the delivery of renewable energy.

"For about US\$50 million, Anguilla can have a robust renewable energy plant that we are paying for and that we own." According to Mr Hodge, ANGLEC is currently spending between \$40-\$93 million a year in diesel cost to supply electricity to the island.
