

Centric energy Macao

Who is Centrica Energy?

Centrica Energy is a renewable energy trading company operating out of eight offices across all time zones to move energy from source to use. Our mission is to drive the green transition while offering sustainable and predictable energy costs for energy producers, suppliers and offtakers. In short, we call ourselves energy movers by nature.

How can Macao become a smart city?

In its "Strategies for Developing Macao into a Smart City and Construction in Its Key Areas" report, published in 2018, the government called for development to revolve around two core principles: human-centric approaches and sustainable practices based on the 17 United Nations Sustainable Development Goals (SDGs).

Is Macao a smart city?

With so many neighbours demonstrating successful examples of smart city planning, Macao has plenty of lessons to draw on for its own development. We explore what it means to be a smart city, and what steps Macao should take to achieve its goals. What is a smart city?

How can Macao improve digital literacy?

Macao has made commendable efforts to increase digital literacy in recent years, particularly among youth. For instance, information and communications technology (ICT) competitions have turned student ideas into reality, while internships with regional tech giants have empowered young minds.

What is Macao's smart city collaboration?

Currently, Macao's smart city collaboration revolves around partnerships between businesses, the government and academic research institutes. But more needs to be done to ensure that citizens and civil society organisations (CSOs) actively participate in smart city initiatives, too.
