

Corletta energy limited Turks and Caicos Islands

Who owns Turks & Caicos utility limited (TCU)?

Turks & Caicos Utility Limited (TCU) is wholly owned by FortisTCI and provides electricity to Grand Turk and Salt Cay. In 2010, the government of Turks and Caicos contracted with a consultant to draft recommendations for exploring the use of renewable energy and energy efficiency technologies to create a more sustainable energy framework.

Who owns Turks & Caicos electric grid?

The government-owned Turks and Caicos electric grid was privatized in 2006 through a series of acquisitions to create a vertically integrated structure. FortisTCI, a wholly owned subsidiary for Fortis Inc., is an international utility holding company that owns and operates generating stations and distribution lines across the islands.

Does Turks and Caicos have a policy on energy efficiency?

Turks and Caicos has few policies related to energy efficiency and renewable energy. Historically, the territory has not implemented policy mechanisms to aid in the development of clean and energy-efficient technologies.

How much does electricity cost in Turks and Caicos?

The 2015 electricity rates in Turks and Caicos are \$0.29 per kilowatt-hour (kWh), slightly below the Caribbean regional average of \$0.33/kWh. Like many island nations, Turks and Caicos is almost 100% reliant on imported fossil fuel, leaving it vulnerable to global oil price fluctuations that have a direct impact on the cost of electricity.

What is transforming to green energy in the Turks and Caicos Islands?

The "Transitioning towards Green Energy in the Turks and Caicos Islands" project falls within the development activities of the RESEMBID programme, which is a 47-project programme funded by the European Union and implemented by Expertise France - the development cooperation agency of the Government of France.

Who regulates the electricity sector in Turks and Caicos?

Four main entities are responsible for governing the electricity sector in Turks and Caicos. The governor grants and revokes licenses, regulates the level and structure of tariffs that electric companies can charge for various customer groups, and approves changes to these regulations.

To propel the TCI into an era of clean energy, FortisTCI will invest \$8m to install the country's first solar plus battery microgrids to power 30% of the electricity supply on North and Middle Caicos and 91% of the electricity supply on Salt Cay in 2024.

As you may have guessed from the name, TCI is composed of two island groups. The larger cluster of the Caicos Islands chain to the west comprises Providenciales, North Caicos, Middle Caicos, East Caicos, South Caicos, and West Caicos, whilst the smaller Turks Islands of Salt Cay and Grand Turk lie to the east.
