

Did East Timor have a low electrification ratio?

Even then, East Timor had the second lowest electrification ratio of Indonesian provinces. The events of 1999 resulted in widespread destruction of almost all power sector assets, including administrative buildings, power stations, power lines, and associated records and documentation.

Is biomass a source of electricity in East Timor?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. East Timor: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Can Timor-Leste generate electricity?

Coal- /oil-fired steam power generation, offshore gas and nuclear power are all large-scale options, and are not considered feasible for Timor-Leste, which has a relatively small power system.

### III. GOALS AND OBJECTIVES FOR THE SECTOR

Is there a market for roof-top solar energy systems in Timor-Leste?

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

Is wind power economic in West Timor-Leste?

A USAID-funded wind project has been on going in the "NTT Province" of Indonesia that also includes West Timor. Based on West Timor data, this study concludes that wind power is probably not economic in coastal areas, but it may prove to be economic in the uplands and mountains of Timor-Leste both for grid connected and off-grid applications.

Do Timor-Leste businesses experience electricity outages?

Research shows that nearly all businesses in Timor-Leste experience electricity outages, in some cases multiple times a week. Outages affect businesses in different ways: For tourism businesses, it impacts customer experience (internet, device charging, air conditioning and fans, food quality, and inability to refuel diving tanks).

About GEO. GEO is a set of free interactive databases and tools built collaboratively by people like you. **GOAL:** to promote an understanding, on a global scale, of the dynamics of change in energy systems, quantify emissions and their impacts, and accelerate the transition to carbon-neutral, environmentally benign energy systems while providing affordable ...
