While solar battery storage is optional, it's a wise investment if you want to be able to store your solar panel's excess energy once the sun goes down. It's not a particularly expensive addition to a solar energy system and its inclusion can save you money in the long run and even give you the ability to sell excess energy back to the grid.

Solar battery storage is optional, although when buying a solar energy system, most will opt for a battery to store and use their power once the sun goes down. A solar battery can be a relatively inexpensive addition to any solar energy system, especially as you won't pay 20% VAT which is a UK government policy.
