The U.S. Department of Energy's (DOE's) Argonne National Laboratory (ANL) held a Hydrogen Compression, Storage, and Dispensing Cost Reduction Workshop on March 20-21, 2013, in Argonne, Illinois. The workshop featured 36 participants representing industry, government, and national laboratories with expertise in the relevant fields.

This system has the same layout than the AA-CCES in the work of Astolfi et al. [66] (based on the energy storage system proposed by the company Energy Dome) but with one more thermal storage which stores solar energy from a concentrated solar unit. The high exergy efficiency is reached because the low-pressure storage is a volume variable storage made of a ...

Let me start with diabatic compressed air energy storage. That's a system that has been demonstrated. In both systems, air is compressed using a compressor into a storage. The compression energy is exhibited in two ways. One, it induces high temperature and compressed air. That heat from compression is storage in thermal energy storage.
