How much does electricity cost in Guam?

Electricity costs in Guam are almost double the U.S. national average, although somewhat lower than other islands in the Pacific. The average retail electricity cost in 2022 was nearly \$0.35/kWh, inclusive of a fuel surcharge that can be adjusted every six months based on the market fuel price.

How much energy does Guam use?

Conclusion Total energy consumption in Guam has been increasing over the past 12 years. In 2021, the island consumed 241 million gallons of imported fossil fuels. Of the total energy consumed on the island, less than 4% is supplied by carbon-free renewable energy.

How much energy is lost on Guam?

Transmission and distribution losses on Guam are estimated to be 4.9% according to the U.S. Department of Energy (2020). This is comparable to the United States as a whole (at 5%) (U.S. Energy Information Administration n.d.-b).

How many gallons of fuel are sold in Guam?

Data source: The Bureau of Statistics and Plans Guam (2022) In 2010, Guam Energy Office reported 109 million gallons of motor fuel sold, including gasoline, diesel, and jet fuel (but excluding shipping, air transport, freight, and military) (Baring-Gould et al. 2011).

Does Guam use fossil energy?

3 Guam has no fossil energy resources and meets nearly all of its energy needs--including the fuel for generating most of its electricity--with imported petroleum products. 4,5 However, Guam is increasing its use of renewable energy resources for electricity generation. 6,7

Why is Guam reliant on imported fuel?

With no indigenous fossil energy resources, Guam is reliant on imported fuel for their energy and transportation needs, with most of the imported fuel coming from Asia. The Guam Power Authority (GPA) is a public-power utility and autonomous agency of the government of Guam.

The market for battery energy storage is estimated to grow to \$10.84bn in 2026. The fall in battery technology prices and the increasing need for grid stability are just two reasons GlobalData have predicted for this growth, with the integration of renewable power holding significant sway over the power market.
