What is Energy Vault?

Energy Vault is a global energy storage company specializing in gravity and kinetic energy based, long-duration energy storage products. Energy Vault's primary product is a gravity battery to store energy by stacking heavy blocks made of composite material into a structure, capturing potential energy in the elevation gain of the blocks.

Does Energy Vault have a battery energy storage system?

The last bit of recent Energy Vault news is that it has successfully installed a large (69MW /275MWh) battery energy storage system at the Stanton Energy Reliability Center in southern California. The battery installation is now being operated at full capacity by Energy Vault's partner in this project, Wellhead.

Why should you choose Energy Vault?

With our vast global network in leadership, management, and contribution, Energy Vault is well positioned to meet the large and currently unmet demand for sustainable and economical energy storage for renewable energy generation worldwide.

What is Energy Vault's partnership?

Energy Vault's partnership programs are designed to enhance sustainable production design and to encourage global deployment of Energy Vault Solutions(TM). Energy Vault creates gravity and kinetic based energy storage solutions that are transforming how the world delivers reliable and sustainable electricity.

Is Energy Vault executing on its strategic vision?

"Energy Vault continues to execute on our strategic vision, positioning the company at the forefront of the global energy transition," said Robert Piconi, Chairman and Chief Executive Officer of Energy Vault.

Who owns Energy Vault?

In 2020, Energy Vault was Named Technology Pioneer by World Economic Forum and completed the mechanical construction of the first of its kind, grid-scale testing tower in Castione-Arbedo, Ticino, Switzerland. In 2021, Energy Vault announced investments from Saudi Aramco Energy, and other existing investors.
