

What is a solar EPC contract?

EPC stands for Energy Performance Contracting. Solar EPC contractors are responsible for the design, installation, and maintenance of solar photovoltaic (PV) systems on commercial and industrial rooftops. In return, they receive a portion of the energy savings generated by the PV system over the contract period. Relevant Resources:

Where do most solar EPC contractors come from?

Wiki-Solar pointed out that eight of the top 13 solar EPC contractors come from Europe and half of them are German companies.

What is the largest bifacial solar power plant in Europe?

A solar power plant constructed on agricultural land in Central Greece. The largest bifacial solar power plant in Europe at its time. A challenging project with a natural gas pipeline crossing through the middle of the construction site. If playback doesn't begin shortly, try restarting your device.

How to choose a green field for a solar project?

Every solar project begins with a search for a suitable green field. The first step is the identification of the appropriate land (public, municipal, or private) in terms of geophysical characteristics, inclinations, area etc. Screening of the land is necessary in order to minimize potential future development risks.

The EPC Agreement provides a fixed and lump-sum amount of EUR15.32 million for the complete execution and performance of the works as defined.
