

Does France have a low-carbon energy mix?

France has a low-carbon electricity mix owing to its nuclear fleet, yet many reactors are reaching the end of their lifetime. The country has started an ambitious energy transition by designing a national low-carbon strategy, carbon budgets, a carbon

Why should we partner with Maclean?

To fulfil our 2030 mission, we must partner with like-minded companies like MacLean, which has a proud reputation for designing and manufacturing innovative and high-quality products for underground mining. Importantly, they also share our vision for a mining industry - and a world - no longer reliant on fossil fuels." -30- For more information:

How does France benefit from decarbonised electricity?

France benefits from decarbonised electricity and the lowest per capita emissions of advanced economies thanks to the role of nuclear energy, which accounted for 71% of its power mix in 2019, and the role of hydro power (10%).

What percentage of electricity is generated by hydropower in France?

Hydropower represents half of renewable electricity generation. France aims at a share of 23% renewables in gross final energy consumption by 2020, but had 17.2% in 2019 and 19.1% in 2020 (preliminary data).

Does Emmanuel Macron visit the Saint-Nazaire offshore wind farm?

You'll be asked to sign into your Forbes account. French President Emmanuel Macron visits the Saint-Nazaire offshore wind farm, off the coast of the ...
