

French Guiana residential solar panels

Where does solar energy come from in French Guiana?

The exploitation of solar energy in French Guiana began in the 1980s with the creation of a 35 kWp photovoltaic power plant in Kaw, an isolated village located about 100 km east of the capital Cayenne.

Will French Guiana reach 85% renewables by 2023?

French energy minister Ségolène Royal has signed a decree establishing an energy programme (PPE) for French Guiana, that aims to use solar, biomass and hydro to reach 85% renewables generation by 2023. The PPE for the region in South America was co-developed between France and the territorial community of French Guiana.

Are solar panels a good investment in France?

As electricity prices continue to soar in France - up 60% in four years - more people are turning towards solar panel kits, which promise to help users save on energy costs and installation prices. The estimated extra cost of electricity in 2024, compared to 2020, is EUR540 per household per year.

Can French Guiana produce electricity?

recycling is another potential avenue for electricity production in French Guiana. There are currently only two waste storage, sorting, and processing facilities, namely, a recycling center and a composting platform. The development of this sector seems particularly difficult as it would require a rate of public investment

How does ceog fit with French Guiana's energy strategy?

The population of French Guiana is very quickly increasing. Guiana has to face a considerable energy deficit, especially in the west where the demographic growth is booming. By providing several MW of reliable and clean energy, CEOG fits with French Guiana's energy strategy.

Why is wind energy so expensive in French Guiana?

Wind energy remains expensive because it requires major civil engineering work, and the necessary know-how is not necessarily available locally. As with biomass, the production cost per kWh is considered too high. recycling is another potential avenue for electricity production in French Guiana.

The installation will also bring EDF closer to its Solar Plan's objectives of making it one of France's leading players of solar energy with a 30% market share by 2035. The Toucan 2 photovoltaic power plant, which is located in the French Guiana municipality of Montsinéry-Tonnegrande, boasts abundant solar irradiation at the near-5-hectare site.
