Hi I am working to use Fronius 15kw 3 phase 208v with an input PV between 12kw and 17.5kw. Yah I was offered your setup with 3 single phase inverters to run 3 phase inverters. But since I have 3 phase from the grid and this will be grid tied the power company recommended to use 3 phase inverter. I do not use batteries .

In a single-phase system, a solar panel and battery system is connected to the grid through a single-phase inverter, which converts the DC electricity produced by the solar panels or stored in your solar battery into electricity to power your home. In a three-phase property, a solar panel and battery system can also be connected to the grid ...
