developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

Mayotte: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

My Story: Eric Mayotte. Before I came to Goodwill Industries of the Southern Rivers, I had just lost my job. I was making about \$65,000 per year living in Midland, GA, doing sales for Xerox. I thought I was doing really well initially and then I lost my job due to layoffs, as well as business-to-business sales and the economy being "off." ...
