Where does Greece's electricity come from?

12% of Greece's electricity comes from hydroelectric power plants and another 20% from natural gas. Between 2009 and 2010, independent companies' energy production increased by 56%, from 2,709 Gigawatt hour in 2009 to 4,232 GWh in 2010.

Which electric power company produces electricity in Greece?

As of March 2007, PPC S.A. (DEI) is the biggest electric power company in Greece, producing electrical energy in Greece.

How is wind energy regulated in Greece?

There is a quite long licensing process. Greece's wind energy capacity in MW per year. x-axis is the year and y-axis is the capacity in Megawatt. Solar power in Greece has been driven by a combination of government incentives and equipment cost reductions.

How much electricity does Greece produce in 2022?

As of 2022, electricity generation in Greece stood at 53 terawatt hours of electricity, making the country rank 15th in electricity production in Europe. Discover all statistics and data on Electricity in Greece now on [statista.com](https://www.statista.com)!

How much electricity does Greece produce a year?

The production of coal in Greece also fell to a record low of 0.05 exajoules and was not consumed for 28 consecutive days that same year. As of 2022, electricity generation in Greece stood at 53 terawatt hours of electricity, making the country rank 15th in electricity production in Europe.

Does Greece have a plan for rooftop solar PV?

November 2023, Greece submitted its NECP with more ambitious and updated targets for renewables and solar: 23.5 GW for all forms of renewables, from which 13.4 GW came from solar power capacity. However, there is no roadmap or strategy at this time in regards to rooftop solar PV in particular.

4 "The PowerTitan 2.0's deployment in Greece will further enhance grid stability and contribute to the nation's energy transition efforts. As BESS becomes a crucial part of the further development of renewables, Sungrow is steadfast along with its partners in bridging the road towards its mission clean power for all."

Energy in Greece is dominated by fossil gas and oil. [1] Electricity generation is dominated by the one third state owned Public Power Corporation (known mostly by its acronym DEI, or in English DEI). In 2009 DEI supplied for 85.6% of all electric energy demand in Greece, [2] while the number fell to 77.3% in 2010. [2]
