

# Greenland explosion proof cabinet

What are explosion-proof cabinets?

Explosion-proof cabinets are special equipment that can safely store all kinds of dangerous chemicals. They are also called chemical liquid cabinets, fire-resistant cabinets, fire-proof safety cabinets, flammable and combustible liquid storage cabinets, and hazardous chemicals storage cabinets.

Do explosion-proof safety cabinets need a ventilation system?

If the explosion-proof safety cabinet is placed in a confined narrow space, or the place where the cabinet is placed has strict restrictions on the volatilization of flammable liquids, then a ventilation system should be connected to the vent of the cabinet to eliminate the volatilization in the cabinet. Flammable liquid accumulated in the body; 7.

Can you put corrosive chemicals in an explosion-proof safety cabinet?

It is strictly forbidden to put strong corrosive chemicals in an explosion-proof safety cabinet. Strongly corrosive chemicals should not be placed in the same cabinet as flammable and combustible chemicals, and special strong corrosive chemical cabinets should be purchased for classified storage.

Why should you use explosion-proof cabinets to store hazardous chemicals?

1. Using explosion-proof cabinets to store hazardous chemicals can effectively prevent chemical spills and prevent fire accidents; 2. Effective management of various dangerous goods, safety cabinets of different colors have different functions, and different chemicals that can be stored.

How to choose a Chemical Safety Cabinet?

The choice of chemical safety cabinet can be considered from the aspects of storage container, storage capacity, use environment of the safety cabinet, chemical properties and management of special chemicals. 1. Use environment
