

Guam island mode power plant

Does Guam have a power plant?

Afterward, ownership of the plant converts to GPA. The power plant is a key project for the utility agency and for Guam, not just as a significant power source for the island, but as a major milestone in the consent decree between GPA and the U.S. Environmental Protection Agency.

When will Guam ukudu power plant be operational?

In March 2024, the Guam Power Authority proposed paying an additional USD 5 million to the contractor for the Ukudu power plant to expedite the completion of the new plant. According to the schedule, the contractor, Guam Ukudu Power, was expected to have the plant operational by January 2026 at the earliest.

Will GPA buy Guam Power Plant?

The Korea Electric Power Corp., KEPCO and Korea East West Power consortium will construct and maintain the power plant under a 25-year energy-conversion agreement with the Guam Power Authority. The two entered into the agreement in November 2019, under which GPA will purchase energy from the plant during the length of the contract term.

Will Guam's ukudu power plant be a short-term solution?

The Guam Power Authority said the projects will render a short-term solution to bridge the gap in Guam's power capacity while awaiting the commissioning of the Ukudu Power Plant, which is anticipated around September. GPA has awarded a contract to Aggreko for 20 MW of temporary power within 100 days.

What is GPA doing with Guam ukudu power?

In November 2019 GPA entered into a contract with Guam Ukudu Power, LLC for the construction and operation of a 198 MW Combined Cycle Combustion Turbine Power Plant. This new power plant will allow for the retirement of its oldest plant, Cabras 1&2, and address its emission compliance issues.

Will hammering resound at Guam ukudu power plant?

Metallic hammering can be heard resonating from the Guam Ukudu combined cycle power plant as construction continues at the Dededo site on July 26, 2024.

6 ???· The Ukudu power plant is inching closer to activation and is about 90.5% complete as of Aug. 31, Guam Power Authority General Manager John Benavente told the Consolidated Commission on
