Our panels capture the sun's energy, channel it through discreetly placed wires to an inverter, where it's converted to electricity to power your home. When your solar power system produces more power than you need, It feeds the power ...

The solar array is made up of Solar World solar panels, which is our preferred solar panel manufacturer from the USA. The mounting has been developed by Pacific Solar & Photovoltaics and is structurally engineered to withstand typhoon winds up to 170mph sustained winds, which meets Guam's building code requirements.

In the past, solar companies on Guam were offering leases for solar panels under a "net metering" program. Basically, that means that during the day as your solar panels produce more power than you're using, excess is pumped back into the grid, making your meter go backwards. During the evening, you pull power from your "power balance";
