

Guam sustainable power solutions

What is the Guam Tropical Energy Code (GTEC)?

The Guam Tropical Energy Code (GTEC) is a set of minimum energy-efficiency requirements in the design and materials used in construction, as adopted and signed into law (P.L. 35-145) on January 2021. It reduces the energy needed and lowers energy costs for households in the long-term.

How do I contact the Guam Power Authority?

For more information and agencies, call the CCU Board Secretary at (671) 648-3002 or visit The Guam Power Authority has been serving Guam for 55 years. Contact us to let us know what updates and information we can provide to help you better understand the work we do; or ways we can better serve you.

How much does it cost to restore power on Guam?

The estimated cost for capacity restoration is \$5 to \$7 million, with annual operating costs of \$2-3 million. General Manager John M. Benavente, P.E., stated, "We are pleased to see the CCU's endorsement for our short-term projects, which are crucial in addressing the challenges affecting power generation on Guam."

What assistance programs are available in Guam?

With the conclusion of the Energy Credit Program, GPA emphasizes that customers facing financial challenges can explore assistance programs such as the Department of Administration's Emergency Rental Assistance (ERA) Program and Guam's Homeowner Assistance Fund (HAF) Program.

What is GPA doing with Guam ukudu power?

In November 2019 GPA entered into a contract with Guam Ukudu Power, LLC for the construction and operation of a 198 MW Combined Cycle Combustion Turbine Power Plant. This new power plant will allow for the retirement of its oldest plant, Cabras 1&2, and address its emission compliance issues.

The Government of Guam agencies are also integrating energy efficiency and renewable energy into their portfolio. In 2012, GEO contracted Taniguchi, Ruth, Makio Architects to conduct energy audits for 15 agencies through funding from the American Recovery and Reinvestment Act of 2009 State Energy Program. These audited agencies were retrofitted for energy conservation ...

Residents of Guam can not only lower their energy bills but also contribute to the overall conservation efforts on the island. As GPA continues to work towards a more sustainable energy future, the collaboration of the community becomes increasingly vital in ensuring a resilient and efficient power supply.

In the face of tropical storms, rising energy prices, and mandates for power plant retirement, Guam is increasing energy security and resilience while making significant progress on its path to 100% renewable energy.

Guam sustainable power solutions

Lack of reliable grid power has led to more than half of businesses in sub-Saharan Africa using diesel generation to ensure certainty of supply. Solar power and battery storage solutions are increasingly providing a viable, cheaper alternative for many businesses that see the value in using greener, more consistent power.

Solar energy offers a sustainable, renewable, and abundant power source for the island of Guam. Solar power is mainstream, and with a Federal Tax Credit of 30%, the time is now to invest in a solar system that will lower your power bills, increase the value of your home, and reduce greenhouse gas emissions.

6 ???· GPA, in partnership with the National Renewable Energy Laboratory, received a \$3 million award from the U.S. Department of the Interior's Office of Insular Affairs for Phase II of the Guam 100 ...

Solar greenhouse fan stand as a testament to innovation in agricultural practices, offering a multitude of benefits for growers seeking eco-friendly and cost-effective solutions. By harnessing the power of the sun, these fans provide energy-efficient ventilation and climate control, ultimately creating optimised growing conditions for plants.

Unlock the power of the African sun Since 2008, we have walked the sustainability journey with many businesses through tailored energy solutions. ... Monaco Energy Boat Challenge: A New Era of Sustainable Marine Innovation; Aquinion dives into a greener future with SPS collaboration - solar-powered abalone farming sets new sustainability ...

The Guam Energy Task Force continues to meet to discuss the next steps to take for the island to have sustainable energy future. Executive Order 2010-15 creating an Energy Task Force Committee ... Office has reviewed over 1,200 entries form students expressing their knowledge of energy efficiency and conserving solutions. The Guam Energy Office ...
