

Hartl energy Eritrea

What is Hartl Energy GmbH?

Very quiet and without any emissions. HARTL ENERGY GMBH is an Austrian company dedicated to the development, production and international sale of renewable energy concepts for the construction industry.

How much electricity does Eritrea have?

It is also working towards raising the share of electricity generation from renewable energy. According to the 2019 World Bank Global Electrification Database, 50.3 percent of Eritreans have access to electricity, with electrification reaching 75.6 percent and 36.6 percent of the urban and rural population, respectively.

Can Eritrea lead the way to a sustainable future?

The world is at the tipping point for bolder steps and immediate aggressive actions. Eritrea, a country with negligible emission contribution, can potentially lead the way to secure a safe and sustainable future by taking a different path from previous development trajectories.

When did hydrocarbon exploration start in the Eritrean Red Sea?

"The hydrocarbon exploration history of the Eritrean Red Sea goes as far back as early 1920 when the Italian firm Societa Mineraria Del Africa Oriental, undertook the drilling of a well to few hundred meters depth," said Teklehamanot Debretsion, head of energy and hydrocarbons for Eritrea's, Ministry of Energy and Mines.

What is Eritrea's Nationally Determined Contribution (NDC)?

Eritrea's Nationally Determined Contribution (NDC) identifies a shift from fossil fuel-based energy generation to electricity generation mixes using renewable sources and reducing transmission and distribution losses. It also encourages environmentally sound technologies to reduce greenhouse gas emissions.

Does Eritrea have a solar grid?

Eritrea has two hybrid mini-grids (solar-diesel) with a total capacity of 2.25 MW. One is in the town of Areza with a production capacity of 1.25 MW; another is in Maidma with a production capacity of 1 MW. Both use photovoltaic solar panels connected to lithium batteries.

The Special Meritorious Engineering Awards for Innovation (MEA) stands as the premier and most esteemed engineering awards program in the industry. Annually, it honors the most groundbreaking tools and techniques for discovering, developing, and producing hydrocarbons. Entries for the MEA are evaluated based on their transformative impact, both technically and ...

On the actual project complete four units of POWERTOP solar solutions are used and HARTL ENERGY is very pleased about this positive collaboration with SPIE in the spirit of sustainability. SPIE Germany & Central Europe is a rapidly growing company from Ratingen/Germany and offers system solutions in technical facility management, energy ...
