

Hazelwood Bess Saint Barthélemy

What is the Hazelwood battery energy storage system (hbess)?

Located on the site of the former Hazelwood power plant, the Hazelwood Battery Energy Storage System (HBESS) is a utility-scale battery of 150 MW /150 MWh, making it ENGIE's largest Battery Energy Storage System (BESS) worldwide. The battery is made up of 342 Fluence modules, providing first-rate reliability and safety.

What is Hazelwood?

Jointly developed by ENGIE and Eku Energy, Hazelwood is the first retired coal-fired power station to host a battery storage system in Australia, representing a key moment in repurposing thermal assets for renewable energy technologies.

What is Hazelwood's battery storage system?

Marking a new era in Australia's energy transition, Hazelwood is the first retired coal-fired power station to host a battery storage system in Australia and represents a key moment in repurposing former thermal assets for renewable energy technologies. The 150 MW/150 MWh BESS has been jointly funded and developed by ENGIE and Eku Energy.

What happened at Hazelwood Bess inauguration event?

An official inauguration event was held for Hazelwood BESS this morning, attended by dignitaries including Victoria's minister for energy & resources, Lily D'Ambrosio, and executives from ENGIE, Eku Energy and battery system supplier and integrator Fluence. It is sited in Victoria's Latrobe Valley.

The state's government announced yesterday that civil and building works have now been completed at the Darwin-Katherine Battery Energy Storage System (DK BESS), describing it as a "construction milestone" for the project.

French energy company Engie and its project partners Eku Energy and Fluence have commissioned the 150MW/150MWh Hazelwood battery energy storage system (BESS) at the former site of Hazelwood power ...
