

Hive energy Niger

(IDA), will enable Niger to better balance its energy mix, which is currently largely dominated by thermal energy.

Niger: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

HES Aotearoa is a new joint venture formed by Hive Energy, Ethical Power and Solar South West to develop solar assets across New Zealand. The company is expected to develop a pipeline of nearly 350MW of utility scale PV solar assets across the country.

South Africa's 900,000 t/yr Coega green ammonia plant, being developed by the UK's Hive Energy and Germany's Linde, is expected to sign a 20-year offtake agreement imminently with a major anchor client.

All projects will be co-developed by Hive Energy and T& T Proenergy to the ready-to-build status. Image: Hive Energy. Renewable energy developer Hive Energy has acquired four solar PV projects in ...

At Hive, we are creating transformational change for a cleaner future. In our mission to save the planet, we develop world-class clean energy projects and smart solutions across the circular ...

Hive Energy is establishing its presence in the Spanish renewable market with a further pipeline of 1.5GW of solar projects planned. Currently, the company is developing 1400MW of green hydrogen projects in ...

It is estimated that only around 3% of Africa's energy is sourced renewably, significantly lower than averages across the world. Because of the large coastline, Africa is well suited for hydropower production. At Hive, we are focusing on wave power by creating green hydrogen and green ammonia projects in South Africa.

Hive Hydrogen South Africa and Itochu Corporation of Japan have signed a memorandum of co-operation to advance Hive's Coega green ammonia export project in South Africa's Eastern Cape...

Hive Energy acquired 70% of the DBG Group B.V. The partnership, called Hive BioEnergy, will focus on transforming industrial waste into Biogas and fertilisers. This marks another key milestone in our mission to create transformational change for a cleaner future through partnering with world-class Circular Economy companies.

Hive Hydrogen, a subsidiary of Hive Energy, is working on six green hydrogen/ammonia developments across the globe. Our three core projects are in South Africa, Spain, and Chile. Our Coega project, in South Africa, was launched in December 2021 and the team is quickly progressing the solar farms for the site, as well as the
