What is luxpower / home assistant?

New comments cannot be posted and votes cannot be cast. I have this fully working , search GitHub for LuxPower their is a python script to access the data via Matt. Once home I will post links. Home Assistant is open source home automation that puts local control and privacy first. Powered by a worldwide community of tinkerers and DIY enthusiasts.

Can Lux inverter be linked to home assistant?

If you have followed all of this,you should now have your Lux inverter linked to home assistantand have your usage visible on the dashboard card. If you have any problems let me know in the comments section or discord and I will assist where possible.

How does luxpower know if my inverter is working in China?

By default,the dataloggerplugged into the Lux sends statistics about your inverter to LuxPower in China. This is how their web portal and phone app knows all about you. We need to configure it to open another port that we can talk to.

Is there a ha integration for Lux inverter?

If you are interested this is an integration I've written that is just a simple HA custom integration,it's all written in python however it simply connects to the IOT device locally on the Lux Inverter and displays it in HA. UPDATE my integration can now update every 20 seconds,anything less than this can actually crash the dongle.

How do I set up a luxpower datalogger?

Open a web browser to your datalogger IP (might have to check your DHCP server to find it) and login with username/password admin/admin. Click English in the top right click Network Setting in the menu. You should see the network settings, the top one is populated with LuxPower's server IP Address, the second one we can use.

At this time I haven't implemented any automation, that will come in the future but for now I will show you how I integrated it with Home Assistant and implemented a nice card to display usage. Lux Inverter Setup. By default, ...

The time card is using a time-picker-card.The save and reset buttons are using a button-card.The battery level (the purple slider in the top right hand corner) is using a mushroom-number-card set to a slider. The current settings which are displayed under the time-picker-card are mushroom-entity-card.. The table on the right are the Octopus Agile rates.

Hi Guy, Long time lurker, first time messaging. For starters, thank you for the effort you've put in during the past 3-4 years. It can't be easy to do this alongside the day job! And there are some truly ungrateful posters here who seem to feel entitled to a level of service that really isn't reasonable. You get what you pay for, folks. I'm guessing you are still working ...

Looking to integrate luxpower ac battery inverter into home assistant - i see a guy on these forums found some code to get it working but hes not responding - anyone done this please ? ... Hi All, I would just like to confirm that the solution to LXP integration into home assistant by Guy works a treat! I have been using it for a couple of ...

One of the things I want to do is turn off the LUXPower AC Charge Enable based on certain conditions - I've tried the "call service node" with the domain switch and service turn\_off on the entity Lux AC Charge Enable but this turns the whole Lux Invertor off.

I'm interested in knowing if anyone has setup Solar Assistant with Home Assistant for a Luxpower SNA 5000? It looks like a good way to add the Inverter to the Home Assistant Dashboard, if there are other ways I'd definitely be keen to try options. So far this is the best one I've been recommended...

GNL (Graham) November 7, 2022, 1:39pm 76. Hi Guy.

Good afternoon, i do hope that the personal issues are sorted and you are ok. I emailed i think last Friday and another person did that let me know, but i hadn't previously posted on here to let you know i was emailing. I wondered if you may have received my email. No rush at all as its obviously your personal time you are using to help people with but i just wondered if ...

Hi all, I'm a new Home Assistant user coming over to try and integrate the disparate monitoring systems I have for my home energy setup. I've just installed a Luxpower inverter and battery setup to add to my PV and Eddi diverter to try and build a more centralised monitoring system.

Ciao, sono nuovo in HA, ho un inverter Luxpower, mi piacerebbe provare l'integrazione per configurare alcune automazioni, spero di ricevere una tua gentile risposta, grazie.
