

Homegrid powered by lithion Kuwait

Who is HomeGrid powered by?

HomeGrid is powered by Lithion, a global battery manufacturer. Lithion is a brand that specializes in Smart Energy and manufactures best-in-class residential battery energy storage systems. HomeGrid has 3,029 followers on LinkedIn.

Which HomeGrid battery is right for You?

With the highest output and capacity range available, the Stack'd Series battery is the right solution for residential and small commercial storage projects. From small off-grid cabins, to peak rate TOU (time-of-use) offset, family homes in suburbia, and small commercial projects, the HomeGrid Stack'd Series battery is the proven best choice.

Why did lithion buy HomeGrid?

Lithion acquired HomeGrid after seeing the outstanding quality of the products and the value that it brought to communities during natural disasters and power outages. With Lithion's backing, HomeGrid has been able to scale throughout the United States, and now has launched into Europe and Central/South America.

Can a HomeGrid compact battery store energy?

The average residential home uses about 30 kWh per day, so one HomeGrid Compact battery would not be enough to store energy for an average-sized home. It is possible to connect up to 10 Compact Series batteries in parallel to increase energy storage capacity, but the batteries' power output would still be limited to 5.12 kW.

Which inverter brand is best for HomeGrid?

As mentioned above, Sol-Ark is HomeGrid's preferred inverter brand partner because Sol-Ark's inverters match the capabilities of the Stack'd Series battery. This preference is so strong that HomeGrid decided to come out with the Integrated Series, which is essentially a Sol-Ark inverter on top of a Stack'd Series battery.

Are Sol-Ark batteries compatible with Homegrid inverters?

These batteries are designed to work with inverters from multiple manufacturers (see datasheet linked below for a list), however, Sol-Ark is HomeGrid's preferred inverter brand, because they take advantage of all the capabilities of the Stack'd batteries.

Homegrid is a primary power supply that completely insulates the home from any utility outages. We can support all loads in a home or business, regardless of whether the grid is up or not. For residences, HomeGrid can deliver up to 14.4 kW of continuous power and 16.8 kW of peak power per unit, effectively replacing a 200 Amp utility service ...

Whether you require portable battery power or whole-home backup, our modular, plug & play solutions offer reliable ...

Power from these "peaking plants," which run less than 15% of the year, comes at a much higher cost than electricity generated by baseload power plants that usually run over 90% of the time. ... (LFP) batteries, like those incorporated into Lithion Battery's HomeGrid residential storage and GridBox commercial and industrial storage ...

HomeGrid batteries are a newer product on the market, offered by Lithion, a company with years of experience making batteries. They use LFP battery chemistry, which is safer and longer-lasting than the more widespread NMC battery chemistry. HomeGrid's Compact Series batteries offer 5.12 kWh of storage and are best for tiny houses and apartments.

HomeGrid's energy storage systems are comprised of Tier 1 prismatic lithium iron phosphate cells, built to withstand the test of time, and are capable of whole home microgrids. We take pride in our support with an international sales team and a Nevada based tech support team to support our customers at every level.
