Solar panel connections are often made using MC4 connectors, which are single-contact electrical connectors. The 4 in MC4 refers to the contact pin with a diameter of 4 mm, while the MC stands for the manufacturer Multi-Contact. With MC4s, panels can be readily strung together by manually pulling the compatible connectors from neighboring panels together.

Do all solar panels use the same connectors? No, all solar panels do not use the same connectors, as there are various types such as MC4, T4, MC3, and some manufacturers use generic ones compatible with mainstream MC4 connectors. Are T4 and MC4 compatible?

Slow degradation over the next 30 years is guaranteed by JA Solar. The performance will decrease no more than 2% during the first year and 0.25% annually thereafter. Your modules will retain at least 84.95% of original performance after the 30 years are over. This 545 W JA Solar solar panel also comes with a generous 12-year product warranty.
