

How to protect your rights if you install downgraded photovoltaic panels

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Do I need planning permission for a solar PV project?

The rules apply to both solar thermal panels and solar PV. However, permitted development rights do not always apply as there are a few exemptions. If your project falls into one of these, you will require planning permission unless you can make any adjustments to your plans. Exceptions can include:

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Can solar panels be installed on a listed building?

The solar panels must not be installed on a building that is a listed building, unless the panels are flush with the roof or integrated into the roof covering. If your solar panel installation falls within these parameters, your neighbours won't have any grounds to object.

Are solar panels a 'permitted development'?

There are certain parameters that solar panel installations must adhere to in order to be considered a 'permitted development.' These parameters include: The solar panels must not protrude more than 200mm from the surface of the roof, or more than 1m above the highest part of the roof (excluding chimneys).

Can solar panels be built without permission?

This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission. The exceptions to this rule are typically flats, listed buildings, homes in conservation areas, and ground-mounted installations. What are the building regulations for solar panels?

If panels are to be fitted to a building in your garden or grounds they should not be visible from the highway. To be safe we recommend you check all installations with the local planning office. ...

Check the angle of your solar panels and adjust them if possible. Mounting panels at an angle allows the snow to slide off more easily, preventing accumulation. Use a Pulley-Operated Tarp; Install a pulley-operated tarp system above your solar panels. During snowfall, you can quickly pull the tarp over the panels to protect them.
