

The Government of the Kingdom of Swaziland has prioritised sustainable energy in an attempt to reduce energy insecurity, alleviate poverty as well as mitigate and adapt to climate change. It was therefore important for the country to align itself with the three goals of the Sustainable Energy for All (SEforALL) initiative and opt into the ...

Leaked documents from the Eswatini Financial Intelligence Unit (EFIU) reveal how, in late 2018, the kingdom's authorities began secretly investigating suspicious payments amounting to tens of millions of rands between entities linked to two politically connected businessmen. The investigation raised red flags regarding the relationship between Keenin ...

developing areas. Energy self-sufficiency has been defined as total primary energy production divided by total primary energy supply. Energy trade includes all commodities in Chapter 27 of the Harmonised System (HS). Capacity utilisation is calculated as annual generation divided by year-end capacity x 8,760h/year. Avoided

The newly established Eswatini Hub is housed in the University of Eswatini, under the Department of Geography, Environmental Science and Planning (GEP). Other key partners of the hub include Eswatini's National Disaster Management Agency (NDMA), Eswatini Environment Authority (EEA), and the Coordinating Assembly of Non-Governmental ...

Excerpt of Mint of Eswatini FNB bank account (November-December 2018) Schofield alleged that Mathias sent money to Schofield & Co., which then passed the money to Mint of Eswatini based on invoices Mathias generated for gold bars and coins. Mint, in turn, sent the money to Mathias Holdings in Dubai, ostensibly for the purchase of gold products.

o To strive to provide all households with access to modern energy by 2030. o To develop 40 MW Solar PV and 40 MW Biomass project by 2024 o To ensure energy security by 2026 (baseload generation capacity) o To provide adequate supply of energy to drive the economic recovery

Eswatini has an installed and operating capacity of 71MW which is owned and operated by the Eswatini Electricity Company (EEC) against 234MW peak demand ¹. The installed capacity includes about 60.4 MW hydropower as well as about 10 MW solar PV that is coupled to a 1 MW battery storage system.

The Eswatini Energy Regulatory Authority (ESERA) is searching for private minigrad developers to design, construct, operate and maintain a minigrad system that will electrify a remote community in ...

The overall electricity access rate in Eswatini is estimated by Power Africa at 83 percent in rural areas and 95 percent in urban areas. GKoE has taken actions to encourage energy battery storage, including offering an

Hub energy Eswatini

SEZ to a company seeking to build a vanadium-flow battery farm funded in part by the Export-Import Bank of the United States.

Eswatini has launched a tender to develop a solar minigrid project to electrify the Bulimeni community, which includes 92 households in the Shiselweni region of southern Eswatini. The tender invites private minigrid ...

This raised suspicions within Eswatini's authorities that the pair "might be using the country as a conduit for smuggling illegally obtained gold out of Africa through Eswatini to the United Arab Emirates under the guise of a company," and that this was being done to "conceal the true source and purpose of the funds received and transferred," according to a letter the ...

Globeleq and Sturdee Energy have been selected by Eswatini Energy Regulatory Authority (Esera) to develop two solar power plants. The power plants will have a cumulative capacity of 30 MWp. The project developer will also construct transmission infrastructure that connects the plants to the grid.

Frazium Energy, a subsidiary of Frazer Solar, has signed a 40-year agreement with the kingdom of Eswatini to install a solar power plant plus storage in the centre of the kingdom. The Edwaleni plant is set to cost \$115 million and will comprise 75,000 solar panels providing a cumulative capacity of 100MWp.

ESERA was established by an act of parliament, the Energy Regulatory Act, 2007, which gives it the statutory right to regulate the electric power industry in Eswatini. The establishment of ESERA by legislation enhances the credibility of the institution and is likely to have a positive impact on investor and consumer confidence.

Eswatini has launched a tender to develop a solar minigrid project to electrify the Bulimeni community, which includes 92 households in the Shiselweni region of southern Eswatini. The tender invites private minigrid developers to design, construct, operate, and maintain the Bulimeni Solar PV-Battery minigrid project for a 20-year operation period.

The first phase will build upon the already developed 35-kW Solar PV system which currently supplies power to 21 homes and two churches by integrating a productive use of energy (PEU) component on the demand side. In its second phase, the AMP will develop an energy hub for community-based small businesses like grocery shops and salons.

Eswatini: Energy intensity: how much energy does it use per unit of GDP? [Click to open interactive version.](#) Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

The establishment of a zero-tax Free Economic Zone will open Eswatini's market to a wide range of global investors, with projections to register between 600,000 and 1 million new companies by 2025.

The International Atomic Energy Agency (IAEA), in conjunction with IRENA and MNRE, EEC, ESERA,

Hub energy Eswatini

CSO and UNISWA, is updating the masterplan up to year 2050. The draft of the updated Energy Masterplan 2050 is published and will seek Cabinet approval in Q1 of 2024. Short-term Generation Expansion Plan (SGEP), 2018 (MNRE)
