AIMS Power inverters are the solution for off-grid, mobile and/or backup electricity in Tunisia. Tunisia's electrical grid, which operates on 230 Vac 50 Hz, will frequently go down and leave residents of the area with no power whatsoever.

Mobile inverters are like regular inverters. They convert direct current into AC for domestic use. All the household appliances work on AC but the power generated from the Solar Panels is DC.

Solar inverter board production: use automated machine plug-ins. Improve efficiency, reduce loss, and enhance stability. Solar system application: Tanfon Supply : Free site survey, design, production, installation, maintenance with our sophisticated one-stop service.

The process of converting DC to AC within a battery inverter involves a complex interplay of electronic components and sophisticated circuitry. Let's break down the key steps: DC Input: The inverter receives DC power from the battery bank, which is typically composed of multiple batteries connected in series or parallel to achieve the desired voltage and capacity.
