What happened to ion storage systems?

BELTSVILLE, Md.-- (BUSINESS WIRE)--Ion Storage Systems (ION) announced the initial closing of its \$30 million Series A fundraising round led by Clear Creek Investments, VoLo Earth Ventures, and Alsop Louie Partners.

What is ion storage systems?

Ion Storage Systems,from its new state of the art HQ and manufacturing facility,creates high energy density,solid state lithium metal batteriesthat are safer,lighter and enable form factors with tighter packing density that enhance system performance.

Who invested in ion batteries?

Clear Creek Investments,VoLO Earth Ventures,and Alsop Louie Partners led the investment. With the funding,ION will commission and qualify a battery cell manufacturing line capable of producing 10MWh/yr of safe,energy dense and versatile solid state batteries.

Why did Clear Creek invest in ion storage systems?

"Clear Creek is excited to invest with and alongside our investors in Ion Storage Systems given the company's innovative battery technology,incredible team,and complimentary commercial partners with the aligned goal of disrupting the battery industry for the better," said Todd Crescenzo,Founder and Managing Partner at Clear Creek Investments.

Will ion build a battery cell manufacturing line in Beltsville MD?

The investment will enable ION to commission and qualify a battery cell manufacturing line at its Beltsville,MD headquarterscapable of producing 10MWh/yr of its safe,energy dense and versatile solid state batteries.

A roundup of the biggest projects, financing and offtake deals in the energy storage sector that we have reported on this year. It's been a positive year for energy storage in 2023, with new markets opening up and supply chain bottlenecks and price spikes for battery energy storage systems (BESS) easing, though challenges remain.

Ion Storage Systems (ION), the battery technology company founded by ECS President Eric Wachsman, announced the initial closing of its \$30 million Series A financing round. Clear Creek Investments, VoLO Earth Ventures, and ...

Product Vertiv(TM) HPL Lithium-Ion Battery Energy Storage System. Designed by data center experts for data center users, the Vertiv(TM) HPL battery cabinet brings you cutting edge lithium-ion battery technology to provide compelling savings on total cost of ownership, with longer battery life, lower maintenance needs, easier installation and services, safe operations and ...

Ion Storage Systems (ION), a Maryland-based manufacturer of high-energy density, fast-charging solid-state batteries (SSBs), announced this week it will receive \$20 million from the US...

Honeywell Process Solutions has announced plans to install about 124 MWh of its battery energy storage systems alongside 140 MW of solar at six sites to help the US Virgin Islands cover 30% of its ...

BELTSVILLE, Md.--(BUSINESS WIRE)--Ion Storage Systems (ION) announced the initial closing of its \$30 million Series A fundraising round led by Clear Creek Investments, VoLo Earth Ventures,...

Ion Storage Systems (ION), a company that has developed a solid-state lithium-ion battery technology, has raised a US\$30 million Series A to expand its production facility and accelerate its entry into the stationary storage sector.

Thermal energy storage company Rondo Energy has completed a US\$60 million fundraising round from investors including Rio Tinto, Microsoft, Aramco and Energy Impact Partners. The funding, announced yesterday (16 August), was provided by existing investors Breakthrough Energy Ventures, Energy Impact Partners, SCG, and TITAN as well as new ones.

Qi said that customers could install a lead acid based system and then switch to lithium-ion in three year’s time if costs have fallen y then as dramatically as predicted y many analysts. Trina Best (known in China ...

Ion Storage Systems develops porous-dense bilayer structured garnet solid-state electrolytes for Li metal batteries with a high energy density, a simple fabrication process, and stable cycling performance.

Na-ion batteries are not capable of energy densities as high as lithium-ion (Li-ion) and are expected to last fewer cycles. However, they have the potential to be low-cost if produced at scale, coupled with an expectation of a lower risk of thermal runaway. Na-ion batteries can also use many of the same production

methods as Li-ion batteries.

The German Federal Ministry of Research and Education (BMBF) has approved funding for a consortium on sodium-ion (Na-ion) batteries for energy storage applications. The consortium of 15 companies and universities will research and develop sodium-ion batteries, aiming to develop high-performance, environmentally friendly cells which can be ...

The country's energy storage sector connected 95% more storage to the grid in terms of power capacity in 2023 than the 4GW ACP reported as having been brought online in 2022 in its previous Annual Market Report.. In more precise terms, and with megawatt-hour numbers included, there were 7,881MW of new storage installations and 20,609MWh of new ...

"It propels us closer to our goal of achieving 30% renewable energy consumption in the US Virgin Islands, fostering a cleaner and greener energy ecosystem," US Virgin Islands Governor Albert Bryan Jr said. According to the EIA, about 80% of the solar that is installed on the islands is distributed rooftop PV, and only 20% utility-scale.

The US is also making a push into sodium-ion technology. The US Department of Energy (DOE) last week (21 November) awarded US\$50 million to establish the "Low-cost Earth-abundant Na-ion Storage (LENS) Consortium", which aims to develop high-energy, long-lasting sodium-ion battery technology.

Northvolt has raised US\$1.1 billion in new capital ahead of a potential IPO in the next two years, amidst what a company spokesperson described as a "cautious capital market". The Sweden-based lithium-ion battery gigafactory company has signed a US\$1.1 billion convertible note to finance its expansion.
