

Isle of Man greco power and energy

How will the Isle of Man generate electricity?

Plans to generate about 75% of the Isle of Man's electricity through solar and on-shore wind projects have been backed by the Council of Ministers. Manx Utilities (MU) will look to install solar panels on public car parks and government buildings. Wind turbines could also be built on public land to create 30MW of electricity by 2026.

How much electricity does the Isle of Man need?

While average electricity demand on the Isle of Man stands at 40MW, it can peak at 75MW during the winter and drop at night during summer to 25MW. MU chairman Tim Johnston said "detailed work" to determine the best approach to increase renewable energy was underway.

2 ???· The Isle of Man has a chance to be the "master of its own destiny" when it comes to green energy. That's the view of the chief innovation officer of Island company Exo Technologies.

The energy sector is changing. We're having to re-evaluate our fundamental offering and consider how we contribute to a future that is greener, cleaner and better. Living in island communities amplifies this responsibility, as we can plainly see and imagine the impact that climate change is having on our coastlines, valleys, towns and wildlife.
