Typical products include: high-power AC/DC ...

In 2021, Italy committed to reach a nearly decarbonised power sector by 2035 as part of the G7. Nevertheless, a delivery roadmap has not been identified and it is still missing. To reach this target Italy needs to accelerate RES deployment and achieve a 72% share of RES in electricity generation by 2030 .

In 2023, Italy took a step in this direction by launching its first combined cycle power plant equipped with an H-class gas turbine. The new plant was the result of revamping an existing thermoelectric power station. The station was originally built in 1964 and was transformed into the first natural gas combined cycle plant in the country in 1992.
