

Italy solar housing scheme

Does Italy have a roadmap for solar power development?

Yet, Italy has the potential to do more. In general, Italy lacks a clear roadmap for the development of solar capacity. Financial incentives include tax deductions for PV system purchases and investment subsidies at regional levels, with recent initiatives targeting rooftop solar PV in agriculture and low-income households.

Does Italy have an eco-bonus for solar energy?

Over the past several years, the 50% eco-bonus for PV associated with sustainable-building projects has been one of the main drivers of solar energy development in Italy, according to pv-magazine. The Italian government has raised the so-called eco-bonus for building renovation projects, including PV installations and storage systems, to 110%.

Does Italy have a plan to tackle energy poverty?

The European Commission approved Italy's scheme to support renewable electricity production and self-consumption, with measures including premium tariffs and investment grants. Despite progress, challenges persist, including bureaucratic delays and the lack of a clear strategy to address energy poverty.

Does Italy need a solar PV system?

While Italy has made significant strides in solar PV installations, additional measures are needed to enhance financing, training programs, and public awareness. Additionally, improvements in grid infrastructure are crucial to support the transmission of renewable electricity across regions.

Why did Italy raise the 'eco-bonus' for photovoltaic installations & storage systems?

The Italian government has raised the so-called eco-bonus for photovoltaic (PV) installations and storage systems from 50% to 110%, effectively enabling homeowners to install PV systems at no cost. The higher subsidies are part of measures to bolster the country's economy amid the COVID-19 crisis.

Will the government pay for a heat pump boiler in Italy?

If you live in Italy and want to insulate walls and windows and install a heat pump boiler or solar panels, the government will pay you 110% of the cost. Yes, you read that right. Can you get €5,000 to replace your gas boiler and will it cover the cost? Are heat pumps the answer to climate change and will they replace gas boilers?

FER X is an upcoming Government subsidy-based decree, which intends to add 60 GW of new renewable capacity onto the Italian grid up until 2028. The auction splits technology into 45 GW of Solar and 16.5 GW of Onshore Wind. In the past, Italy has launched prior auctions for solar and wind energy, but arguably they have not been hugely successful.

Dubbed the "Superbonus", the scheme was introduced in November 2020 to help Italians - and non-Italian
