Can solar power help Italy decarbonise electricity supply?

Together with a number of other solar and wind developments concentrated in the south of the country and in Sicily and Sardinia, it is helping to decarbonise electricity supply in Italy and contribute to the country's ambitious renewable energy targets of 40% in total energy consumption and 65% in electricity consumption by 2030.

What percentage of Italy's electricity comes from solar?

According to Eurostat, approximately 11.6% of Italy's electricity now comes from solar energy, while 8.8% is generated from wind power, making Italy one of Europe's leaders in renewable energy. However, these impressive numbers represent just the beginning.

How can Italy increase its solar and wind energy capacity?

To achieve these targets, Italy has set ambitious plans to further increase its solar and wind energy capacity. By 2030, Italy aims to produce at least 30% of its total energy from renewable sources, with a significant portion of this coming from solar and wind power.

How many solar projects does Shell Energy Italia have?

In total, Shell Energy Italia is developing 48 projects, with authorisation - a major step in getting a project off the ground - granted for 20 of them. Together, the projects make up around two gigawatts of capacity, making Shell one of the country's leading solar developers.

How much energy will Italy produce by 2030?

By 2030, Italy aims to produce at least 30% of its total energy from renewable sources, with a significant portion of this coming from solar and wind power. Achieving this goal will require continued investment in infrastructure, technological innovation, and collaboration between the public and private sectors.

Does Italy need a solar PV system?

While Italy has made significant strides in solar PV installations, additional measures are needed to enhance financing, training programs, and public awareness. Additionally, improvements in grid infrastructure are crucial to support the transmission of renewable electricity across regions.

Swell Energy is "Creating a Greater Grid for the Greater Good." We're an energy management and smart grid solutions provider accelerating the mass adoption of clean energy technologies (solar plus energy storage batteries). We make it easy for homeowners and businesses to take control of their energy use, achieve energy security and save on ...

I'm thrilled to announce that I'm joining the Swell Solar Solutions team! Thank you, Eleanor Soininen, for this opportunity. If you're interested in learning...
