

Where can I find information about Guadeloupe energy?

Welcome to the website of Guadeloupe Energie! On this website, you'll find information on Guadeloupe's progress on energy transition from energy legislation to industry data, from profiles for renewable energy in Guadeloupe to the latest news and events--all in one place.

Why is geothermal energy important in Guadeloupe?

Geothermal energy is especially attractive since Guadeloupe is an archipelago. Production can be fully controlled, unlike photovoltaics, for example, which depends on sunlight conditions. Production costs are about half those of fossil fuel power plants and are not vulnerable to fluctuations in the world market.

How can Guadeloupe achieve energy independence?

"Achieving energy independence in Guadeloupe by shifting from fossil fuels to renewable energy sources is a challenge that we must take up for the benefit of future generations. With clear objectives and applying the means for success, the Multi-Year Energy Program (PPE) exemplifies our political resolve to reach our goals."

How much electricity does Guadeloupe generate?

Electricity generated here accounts for 5% total generation in Guadeloupe. Cyclical phenomena brought down production between 2007 and 2010, but production has rebounded since 2013 even though major refurbishing and maintenance work have prevented the plant from reaching its maximum potential of 100 GWh.

When did geothermal power start in Guadeloupe?

Geothermal-powered electricity production began in 1996, with total production increasing to 15 MW once Bouillante 2 was brought on line in 2003. Electricity generated here accounts for 5% total generation in Guadeloupe.

Conditions Générales d'Utilisation du Portail Usagers Multi-Aides Préambule. 1. L'Agence de services et de paiement (ASP) a conçu et/ou héberge des applications informatiques pour le compte de l'Etat et/ou de donneurs d'ordre et permettant à l'utilisateur de réaliser des démarches par voie de communications électroniques.

We're innovating the sector by choosing technology for inshore energy conversion. These are: always active and working, advantageous in terms of costs and benefits, and environmentally friendly. In contrast, working offshore requires invasive installations in relation to the surrounding environment, extended development time and lack of ...
